OCI - Paid Search Instructions

2026 Implementation

Resources
Tech SIM: https://taskei.amazon.dev/tasks/ABMarTech-77

Updates

- 2/18 - space issue has been resolved
    - PS to add kw to some of the URLs

Timeline

- Dial Up:
    - Weekly Flash: Starting 5/11
    -
    - FRITES: Expect 100% dial up request early NW (~3/30)
        - Will need to inform Adobe
        - Start weekly results 5/11
        - Flash: To send 6/3 (will have data for WBR)
    - JP: Moved to 100% Acct tracking 4/1 (had applied at 100% camp. level prior)
        - Start weekly results 5/11 - can defer to X/X due to only Nr+ impact
    - CA: ETA 4/10
        - 4/6 approval > deployment 4/7 > 4/10 AME approval. Aiming for 8-9 for dial up. Then 100% on week of 13th or 20th based on results.
        - ~~How much traffic are we sending. Can start with 3%.~~
            - Will revert to initially applied campaigns
- Transition to OCI MCC:
    - IT/ES/CA: Complete
    - FR: Complete. Transitioned 2/12/26
    - JP: Complete. Transitioned 2/20/26
- Tech: TT and Suffix's to be suppled 2/16 or 2/17.
    - Supplied 2/17, but associate tag was wrong. Waiting for finalized instructions
- Campaign-level testing: CAJPEU4 application 2/26
    - WAIT for confirmation from OCI Tech before proceeding. As of 2/24, this is likely to be delayed
    - Will update TT/Suffix @ campaign level
    - Mukesh requested ~10 reg/day
    - Mukesh will confirm end date
        - Will possibly ask to remove on 3/2, may be extended if they don't get the data they need
        - **Stacey**, please reach out to Mukesh on 3/2 to confirm
- MCM:
    - JP: https://mcm.amazon.com/cms/MCM-147368188/execution/d268a046-4a0e-4ad8-bec8-c6f8c10329c2

        - AME asked for 5 days to approve MCM.
    - FRITES: https://mcm.amazon.com/cms/MCM-145628126

EU3, CA, JP Rollout:

TIMELINE:

Current Traffic enabled during E2E Testing - FR - 15%; IT - 33%; ES - 55%; JP - 100%; CA - 12%

EU3:
3/23 -3/31: FR 25/50/100
3/23 -3/31: ES 55/100
3/23 -3/31: IT: 50/100

- EU3 & JP rollout 2/26 9am (10am FR due to editor slow upload)
    - EU3 25/50/100 Rollout
- CA is delayed due to tech is not ready

Final URL & TT ticket: https://sim.amazon.com/issues/ABMarTech-77#:~:text=Hi%20%40brandoxy%20and%20%40prichwil%2C

TT:

ES: hvocijid={random}-{extensionid}&hvexpln=ssrText&ps_kw={keyword}&tag=abpsgglacqes-

JP: hvocijid={random}-{extensionid}&hvexpln=ssrText&ps_kw={keyword}&tag=abpsgglacqjp-
```

Resources

US/UK/DE Application: CI Planning - Phased Rollout

ETA: Review on 11/20. Due prior.
Next Steps:

- Can use this Quip for now, **Brandon** to find alternative to Quip
- Billing: to add/check Billing updates - **Yun**
- Tracking Template:
  - ~~TT format - Brandon.~~ Done
  - Application at Keyword-level, Campaign(?) and Account-level - **Richard / Stacey**
- Account Split: Approach to doing ramp-up (25%, 50%, 100%) (identification of campaigns and application - leading to TT section) - **Richard**
  - E2E testing by selection a few kws
  - 25% dial up on traffic to test tracking
  - Click reporting needed by tech team
- AMO: Need to Add AMO actions - **Stacey**
- Timeline: TvC timelines and phases - **Richard**
- Tech Needs/Updates: API info, providing acct IDs - **Brandon**
- Measurement: How we gauged TvC perf and reported on it - **Stacey**
  - link to report Andrew built
- External Reporting: Flash process and timing - **Andrew**
  - Include link to flashes (wiki)

Application / Testing Phases

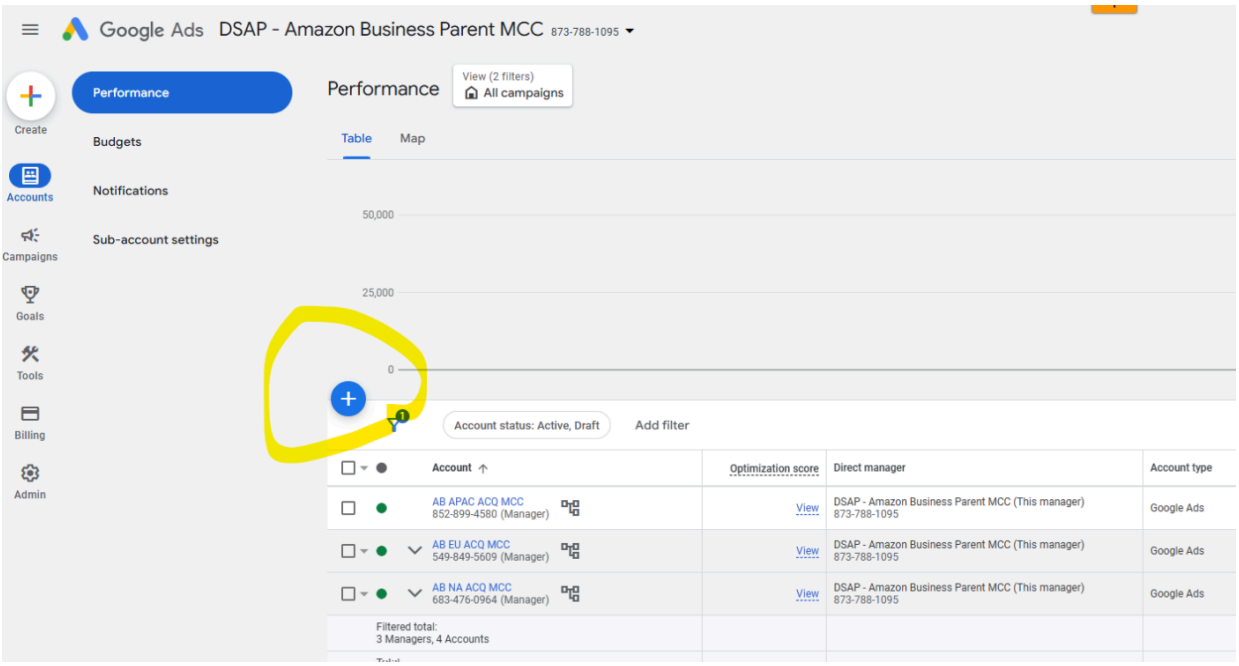
- MCC Tech Email Logins:
  - APAC: ab-paidsearch-oci-apacific@amazon.com I 7/19/1990, Male
- Setup MCC (if new region)
  - Create MCC
  - Provide Tech Access
    - Provide tech access to MCC (if new)
- Subset testing: test TT/Suffix on a sub-selection of campaigns
  - Identify Campaigns to apply (~10 reg/day per marketplace)
  - Tech to provide TT/Suffix per marketplace
  - Do not make account changes (like Account Conversion) - leave account setup as-is
  - This runs in market X days
  - Risk: Ads may be disapproved. This will require manual reapproval submission (usually resolved same-day)

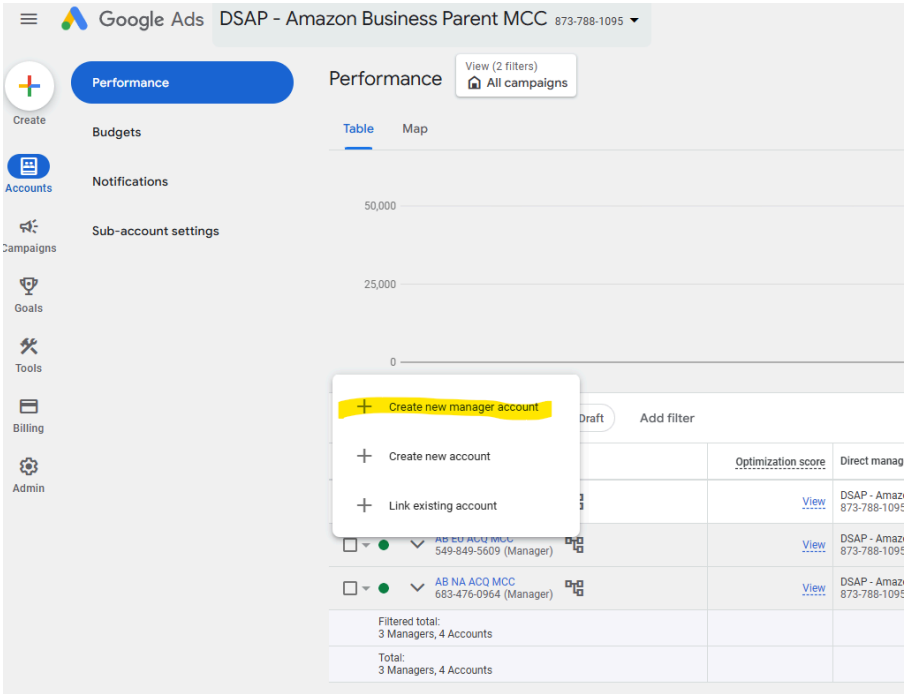
Prerequisites

1. Confirm existence of Associate Tag
    a. Approved Associate Tags can be found here.
2. Ensure all refs are unique per kw
3. Ensure there are no URL Suffix Overrides
    a. Campaign Settings
    b. Ad Group Settings
    c. Ad URLs (esp. ETA's)
    d. Sitelinks
4. Ensure all ads are "Search"
    a. DG and other ad types are not supported by OCI

Create New Regional MCC

1. Identify if MCC is needed. Note that Accounts within the same MCC will learn from each other and share data.
    a. MCC setup is currently:
        i. Moved I In Progress
        ii. NA: US / CA / MX
            1. MCC 683-476-0964
            2. ConvActID: 7084593089
        iii. EU: UK, DE, FR, IT, ES [BE & NL]
            1. MCC 549-849-5609
            2. ConvActID: 7084804303
        iv. JP MCC
            1. MCC 852-899-4580
            2. ConvActID: 7251102458
        v. not created - 1 MCC: AU
2. To create a New Regional MCC under Master MCC:
    a. Create under DSAP - Amazon Business Parent MCC (Master OCI MCC, 873-788-1095)





a. New MCC Naming structure example: AB EU ACQ MCC

Provide Access to Tech

1. Create List in Elmo
2. List should follow format: ab-paidsearch-oci-apac@amazon.com

3. Check other distro's for appropriate settings/people to include
    a. APAC
    b. EU
    c. NA
4. Give Admin access to the Distro at the MCC level
5. Click verification email to confirm access
6. Assign ownership of list to chandop@ (or current owner of other lists)

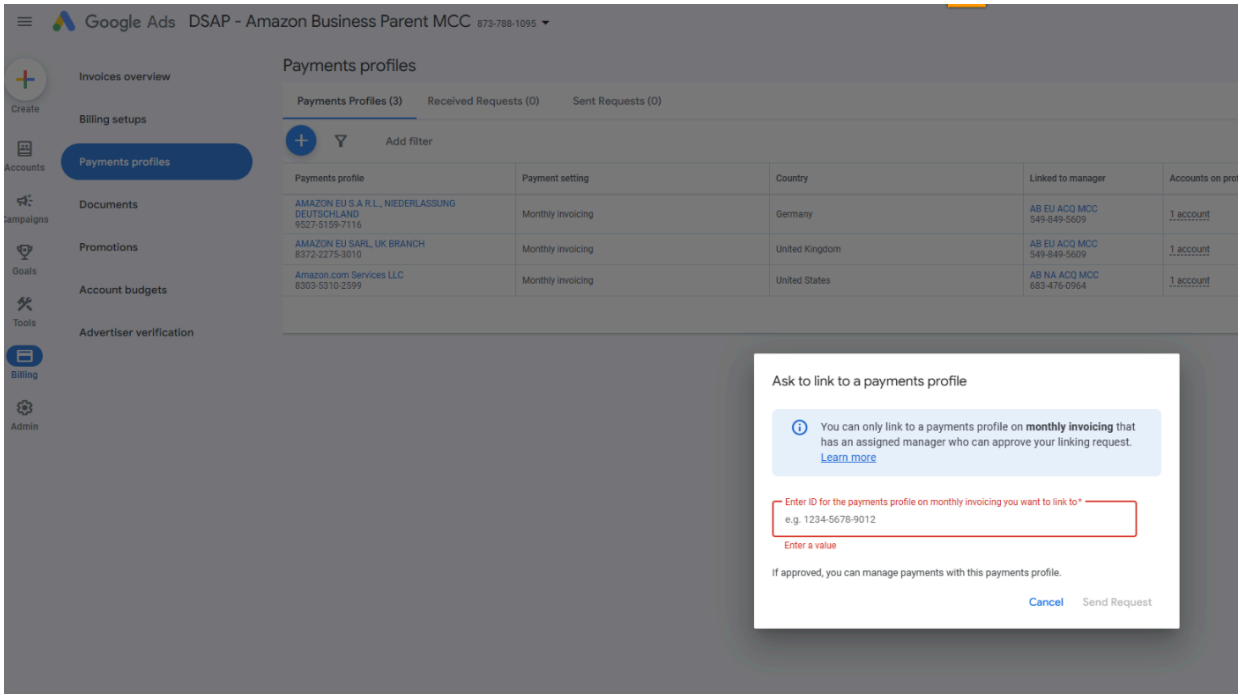
Create Conversion Action

1. Goals > Create Conv Action
2. Conv Action Name Format: AB NA Valuation Import
3. Select Conversions Offline
4. Data Source: Skip this step
5. **Attribution: Last Click**
    a. Do not use DDA, as per Central. If prompted, Opt Out of notifications to switch to DDA.
        i. 
    b. Note: PS team aligned on using LC given AB OCI Value already contains attribution modeling & we aren't competing with other Google ads for acq credit (ie. YT, Display, GMail, etc)
6. three dots > Change to another conv goal: Other
7. End settings should look like the below
        i. 
Cross - Account Conv for Child Account

1. MCC > Accounts > SubAccount Settings > GA Conv Acct: **This manager**
    a. make the change least 6 days before E2E testing.

b. 
Billing Update

1. Link Current Payment Profile to the new regional MCC or NA OCI MCC/EU5 OCI MCC
    a. Billing>Payments Profile> Click “+”



1. Billing Transfer Scheduled

Steps to complete the Change Who Pays- https://support.google.com/google-ads/answer/13812597?hl=en&sjid=17062215764393358839-NC
Select **External Billing Transfer.**
Future payer name will be the same company name on the existing payment profile
Will need to input new account budget in the new MCC after the submission (the steps that will follow after the submissions)

1. After the payment/billing transfer happened successfully- Unlink the account from the old MCC and link to the new one
2. Unlink the account from the current MCC and link to the new MCC

Tracking Template

1. Application: Coordinate with Tech on timing for individual market rollout.
    a. Prerequisites: Do not make changes until aligned and following the MCM

        i. For example, do not remove kw-level tracking until actively moving to the next phase (25%)
    b. Typical Timing: Coordinate with tech on levels and timing
        i. ~2% - Kw level to ensure clicks move through the pipeline
        ii. 25% - Applied Thursday, campaign level (remove click level)
        iii. 50% - Applied Monday, campaign level
        iv. 100% - Applied Tuesday, Account level (remove campaign Level)
2. Format:
    a. Parallel Tracking: Leave deselected (no action needed)
    b. Tracking Template: https://na.amazon-value-service.com/cl/v1/p/BSQ1ZjkFy2M2q-R5Vhq2HzSs5l2d8ndQPn0KMtF79_ieEA?lp={lpurl}&vscl={gclid}&vsco={gbraid}
    c. Suffix: hvocijid={random}-{extensionid}&hvexpln=ssrText&tag=abpsgglacqus-20
        i. tag= represents the Associate tag, and is unique to each market. Find the list of tags here: ssoc Tag: [Amazon Business] Associate Tag - Account List

Account Split

Account Split: Approach to doing ramp-up (25%, 50%, 100%) (identification of campaigns and application - leading to TT section) - **Richard**

- E2E testing by selection a few kws
- 25% dial up on traffic to test tracking
- Click reporting needed by tech team.
    - Link to DE report.
    - Explain invalid clicks if reported clicks are slightly lower than E2E clicks. Here's what Google says about invalid clicks. "Invalid clicks are clicks that don't come from genuine user interest, such as accidental clicks or clicks from automated software. Google's systems automatically detect and filter these out."
      Examples I found: 1) Accidental clicks that have no value, such as the second click of a double-click 2) Manual clicks meant to increase someone's advertising costs. 3) Manual clicks meant to increase profits for website owners hosting your ads. 4) Clicks and impressions by automated tools, bots and spiders, crawlers, or other deceptive software. 5) Clicks that are known invalid data-center traffic or are considered irregular patterns identified through monitoring. 6) Impressions meant to artificially lower an advertiser's clickthrough rate (CTR). 7) Multiple clicks from the same IP address
- Check keywords regularly after application of tracking templates, many may receive disapprovals for “Destination mismatch”. Appeal these to resolve disapproval

AMO Feed Update

Steps

1. AB data team to send both existing EFID feed and new ref marker feed to Adobe (ADB)
2. ADB team to validate data from both feeds to ensure no big data variance by comparing EFID regs and ref marker regs.
3. ADB team to create parser for new feed (3 business days) if no issues from step 2
    a. Since we already created parser when rolled out in US/UK, pls check w/ADB team that if still need to create new parser when expand to ROW

4. AB Paid search team to remove account level ADB tracking, and add OCI tracking in related regions
5. AB data team to remove related region data from existing EFID feed and only send new ref marker feed to ADB
6. AB data team to send conv value to G ads
7. AB Paid search team to keep using the old EFID regs as ADB bidding objective, but exclude the following 5 days dates data from ADB bidding modeling
8. ADB team to validate the data between new feeds and UI report for the following 5 days data, ensure no big data variance compare UI data vs feed data
9. ADB team or AB paid search team to create new objective in ADB if no issue from step 7 data validation
    a. Since we already created EFID ref marker regs objective when rolled out in US/UK, pls check w/ADB team that if still need to create new objective when expand to ROW
10. AB Paid search team to update ADB bidding objective to new objective, so we use new objective for ADB bidding during machine learning period, and in control groups for first phase
11. ADB team and AB Paid search team to validate conv value shows correctly in ADB UI

Measurement

Expectation:

- 25% registrations lift based on 50% Non-Brand CPA improvement, and Non-Brand counts 50% of registrations.
- CPA expect to improve by -50% on Non-Brand, and -20% on Brand

Baseline build up

- pull past quarter or past 3 months data, get average weekly performance on Non Brand and Brand plus
    - Chart A: list avg weekly spend, regs and CPA based on past 3 months data
- pull last year data for the following 2 months, get average weekly performance on Non Brand and Brand plus
    - Chart B: list avg weekly spend, regs and CPA based on last year following 2 months data
- Compare chart A and chart B, if the data is not closed to each other, or not following spend% closed to 2X regs %, list reasons
- Check on past 3 months data vs following 2 months OP2, to see if seasonality will impact budgeting
    - if no seasonality impact, use chart A as baseline
    - if related to seasonality, calculate the baseline based on chart A by considering related seasonality
- Example: Use Non-Brand as example and mark up data below
    - Based on Apr to Jun this year data, on average we spend $40K per week to generate 400 regs with CPA $100
    - Based on Jul & Aug last year data, on average we spend $40K per week to generate 444 regs with CPA $90
    - We get +10% higher CPA than last year due to competition this year
    - Based on -50% CPA improvement on Non-Brand:
        - we expect to spend $40K per week to generate 800 regs with CPA as $50
        - YoY expect +80% regs increase (instead of double regs) due to higher competition this year

Control vs Test, OCI rollout to 50% or < 100% campaigns (Phase 1)

- Make spend distribute evenly on Control vs Test, with total spend closed to baseline spend
- Example: continue using data from Baseline build up step

    - Control budget is $20K per week with CPA as $100; Test group budget is $20K per week with CPA expect to be $50

OCI rollout to 100% campaigns (Phase 2)

- Make spend closed to baseline spend
- Example: continue using data from Baseline build up step
    - Weekly spend is $40K, expect to have $50 CPA.

Measurement

- compare actualized CPA with baseline CPA, and calculate regs lift.
- consider on spend difference impact if budget is not closed to baseline budget
    - use spend% closed to 2X regs % to calculate regs lift

CAMPAIGN LIST FOR INITIAL TESTS (2.26)

CA:

Revised List /3
[AVT-S] Apparel (Cat) - [D] [BMM]
[AVT-S] Food Service (Cat) - [D] [BMM]

Error

We're seeing errors in our CIT dashboards due to duplicate `hvocijid` parameters in landing page URLs. The landing page URLs from Google are being generated with `hvocijid`, `hvexpln`, and `tag` parameters appearing twice in the same URL, causing "Duplicate query param found - hvocijid" errors in our event processing across EU3 regions, including in already launched marketplaces(US , UK & DE). And For Now we dont see any errors In JP.
